

A mechanism to pick the deserving winner *

ANNA MOSKALENKO

Universitat Rovira i Virgili

A group of individuals is choosing an individual (the winner) among themselves, when the identity of the deserving winner is a common knowledge among individuals. A simple mechanism of voting by veto is proposed as an alternative to the mechanism studied by Amorós (2011). Like Amorós' (2011), the suggested mechanism implements the socially desirable outcome (the deserving winner is chosen) in subgame perfect equilibria.
